

# Banner Urgent Care - non-respiratory locations now seeing patients

Select locations will treat all non-respiratory illnesses and injuries

PHOENIX (April 17, 2020) – Banner Health is now offering [Banner Urgent Care – non-respiratory locations](#) at select urgent care sites in Phoenix, Tucson and in Northern Colorado. Like all Banner Urgent Care facilities, these particular locations are open to the general public, offering treatment for most common illness and non-emergent injuries, including broken bones, insect bites and lacerations. However, Banner Urgent Care – non-respiratory locations are not intended to treat patients with respiratory complaints such as COVID-19.

“The intention of this service is to prevent our patients and staff from potentially being exposed to

a respiratory illness such as COVID-19, especially those who may be susceptible to the virus because of a pre-existing medical condition,” said Katrina Catto, CEO of Banner Urgent Care and occupational health. “Everyone who comes to a Banner Urgent Care – non-respiratory location will be screened for COVID-19 symptoms before they can enter the building. If it’s determined that they could possibly have the signs and symptoms of the infection, we’ll re-direct them to their primary care physician or a designated specimen collection site where they can get the proper testing.”

“ The intention of this service is to prevent our patients and staff from potentially being exposed to a respiratory illness such as COVID-19, especially those who may be susceptible to the virus because of a pre-existing medical condition ”

Banner Urgent Care – non-respiratory locations include:

- [1660 N. Higley Rd, Suite 104 – Gilbert, AZ](#)
- [13901 W. Meeker Blvd – Sun City West, AZ](#)
- [11685 W. Van Buren St – Avondale, AZ](#)
- [5545 E. Broadway Blvd, Suite 101 – Tucson, AZ](#)
- [2555 E. 13th St, Suite 110 – Loveland, CO](#)

Because of the nature of the COVID-19 virus and its potential spread, Banner Health can’t guarantee that patients who are seen at a designated Banner Urgent Care – non-respiratory location have not been exposed to COVID-19, or that patients who do not show signs and symptoms are free of the COVID-19 infection.

Catto added, “In addition to screening people for COVID-19 before they enter, to help prevent the spread of this virus we’ll take reasonable precautions, including requiring patient, visitor and staff masking, and practicing social distancing.”
