

My contributions to the history archive include a few memes, and an art culture. Memes in response to COVID-19(Sailor Moon occurs in the art community later in this document).

One is from the internet involving the BLM protests that occurred, as well as the boom in popularity for the RPG dungeons and dragons. The other is from an art boom focusing on bakers who makes cakes that look like real items.

Another trend in art, involves a kid's cartoon from japan. Artists redraw a famous scene from the cartoon in various art styles as a way to present their creativity or make a joke.
