

The one where we were quarantined

DISCLAIMER: This item may have been submitted in response to a school assignment prompt. See Linked Data.

quarantine has truly been an experience like no other although there has been plenty bad there has also been some good I enjoyed being able to be home with my family more and get to bond on another level much like how we did when we are younger we got to do things like bake, tie dye and watch movies I do wish it was under different circumstances but none the less I am happy I was able to be with my family.
