

My name is Cardin Madera I go to Lone Star Middle School, and I enjoy school. I would describe the start of this school year weird because it has been a long time when I last went to a full year of school and I am not into the routine yet, so it makes it weird. Last year is similar because we still must sanitize our hands to keep us safe. Also, the staff are still not messing around about Covid-19. If you were to tell a joke about Covid, "saying this kid has Covid" and it is a lie you would get in trouble. It is different than last year because we do not have to sanitize our hands as much. Then we get to have our masks off the entire day if you want and it is not like we have half of the school students at school and the other half at home.

There are somethings that changed between 4th and 7th grade because during 5th grade we were almost done with the school year but then covid hit and we had to do online for the rest of the school year. Then in 6th grade at the beginning of the school year we were doing online for a long time, and it was not helping a lot because I really could not ask questions about the assignment we are doing and about the lesson.
