

## AP TESTS

All year my classmates and I have studied and worked in order to ace the AP tests. However due to quarantine we were unable to take the normal AP tests and had to take the online version. One year of work was graded with 1-2 essay(s) which is completely unfair. Due to the essays covering only a small portion of the year my classmates and I were annoyed. During the actual tests there were different prompts, all varying in difficulty, which is unfair. Many people often had trouble with the whole experience and there are several classmates that have to retake the test. The AP tests this year was a doozy yet I'm glad it is over. Hopefully a vaccine comes out soon and this pandemic ends because the future looks so hopeless.
