

## Covid-19-Bhutan

Covid-19 pandemic has affected almost all the nation in the world and I knew it would affect our country also. It was unfortunate, and I had mixed feeling when the prime minister announced that school and collage would be closed due to outbreak of covid-19. Tourist was restricted and slowly Bhutanese who were returning from others country was all tested and kept under quarantine for 21 day. From that day our collage and school were suspended and we are asked stay in hostels and not allowed to come in or go out of campus. And after one week of suspension student were sent home. Since then I have been home as all school and institution were closed and this pandemic has brought on challenges to educators, parents, and mostly to student. Doing all things with online was a challenge because it was the first times for us. We started sharing lessons on wechat, VLE and do online meeting. For me e-learning is very tough because of network issues.

Till now in our country Bhutan we have only 67 people who tested positive for covid-19, two were USA tourist who visited our country and others people are one that are returning from aboard. And our country made best decision to keep all people in quarantine who are returning from aboard and this was most successful as we managed not to spread virus to our local people. I offer my gratitude to his majesty the king, government and others official. lets fight back together with hope for betters days.
