

Emptiness & Unknown
By Alexandria Bucy

For the first time in years, Vegas streets filled with the stillness of a quiet breeze

And although much uncertainty, the jobless begged, please

News coverage seemed just as confused and skeptical as the average Joe

No one knew, just what to know

Government officials couldn't put their problems aside for the greater good

People have starved, died, and have even misunderstood

Lies were told, deception occurred, and mass hysteria was made

And record unemployment was just how people were paid

The emptiness and unknown of the corona disease is what brought forth that quiet breeze
