

My COVID 19 dilemma.

DISCLAIMER: This item may have been submitted in response to a school assignment prompt. See Linked Data.

Throughout my life I have heard stories about past and all the hardships that was encounter and I never thought I will go through the same thing. 2020 brought about a pandemic that will always be remembered. The virus was heard in December 2019 and everyone downplayed the seriousness of it. Everyone thought it was not serious however as it traveled across the globe it laid waste in its path. Killed about 1 million people including friends of mine who fell victim to it. I was emotionally drained and physically depressed due to our new style of living. We lost what we knew was life. Our every day norm and the whole world was on pause. Class being moved to remote didn't help me academically because not only was I distracted but I kept thinking of what was going on in the world. COVID 19 affected me by ruining all the opportunities I had lined up for 2020, it wasted 1 year of my life and I failed to do anything productive. If life has thought me anything is that nothing last forever and fortunately we are beginning to enter our old life and I can make up for everything I couldn't have done this year.  
Junior undergrad majoring in HNSC with the concentration in public health.
